

Powah Stage // Phase U 100V, 220A, 2.1mohm Rdson
 Designed by Vin Shin January 2026

My first time designing a power stage in general.

Using latest UCC27300 drivers from TI

Using goated Infineon OptiMOS 7 series FETs

Powah Stage // Phase V

100V, 220A, 2.1mohm Rdson

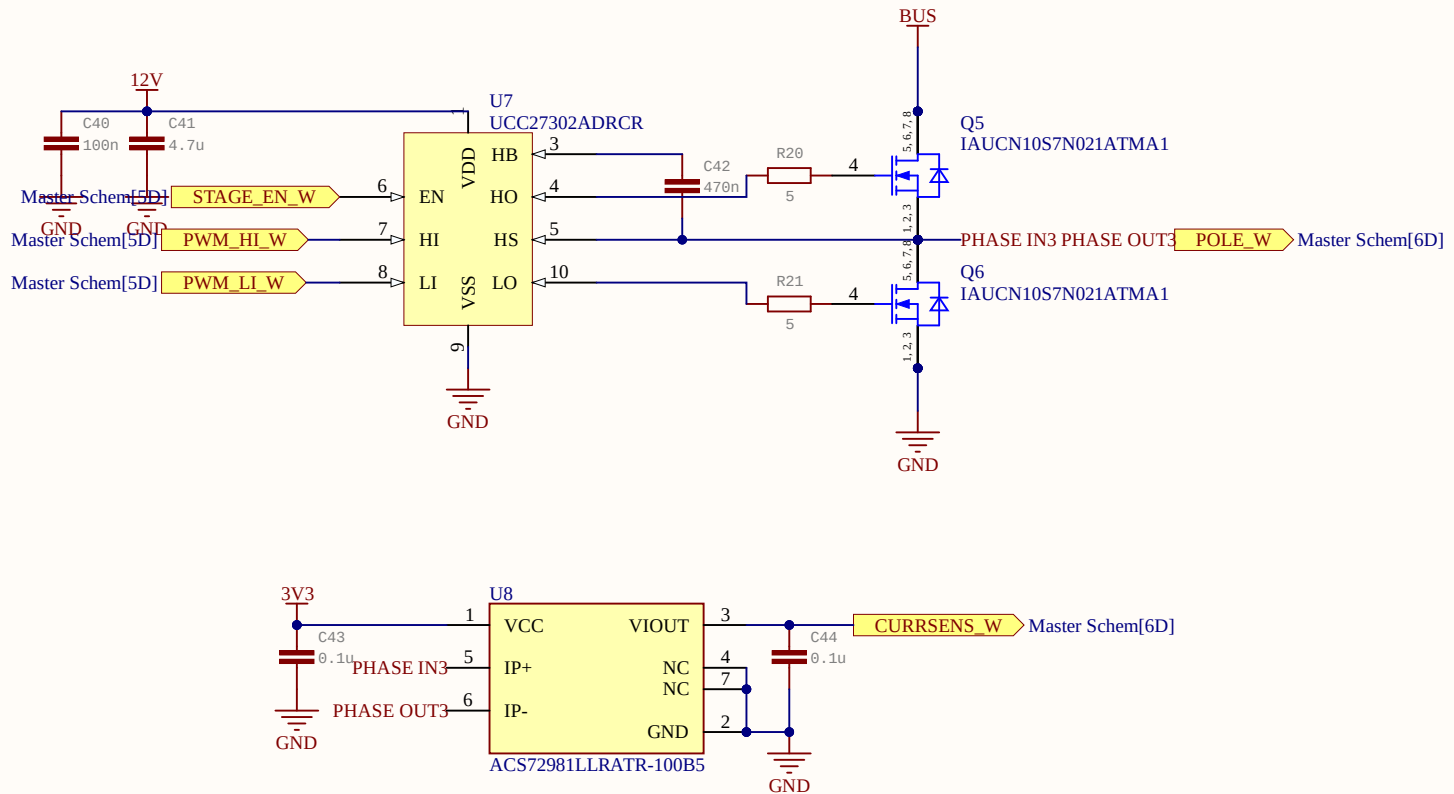

Designed by Vin Shin

January 2026

My first time designing a power stage in general.

Using latest UCC27300 drivers from TI

Using goated Infineon OptiMOS 7 series FETs

Powah Stage // Phase W 100V, 220A, 2.1mohm Rdson

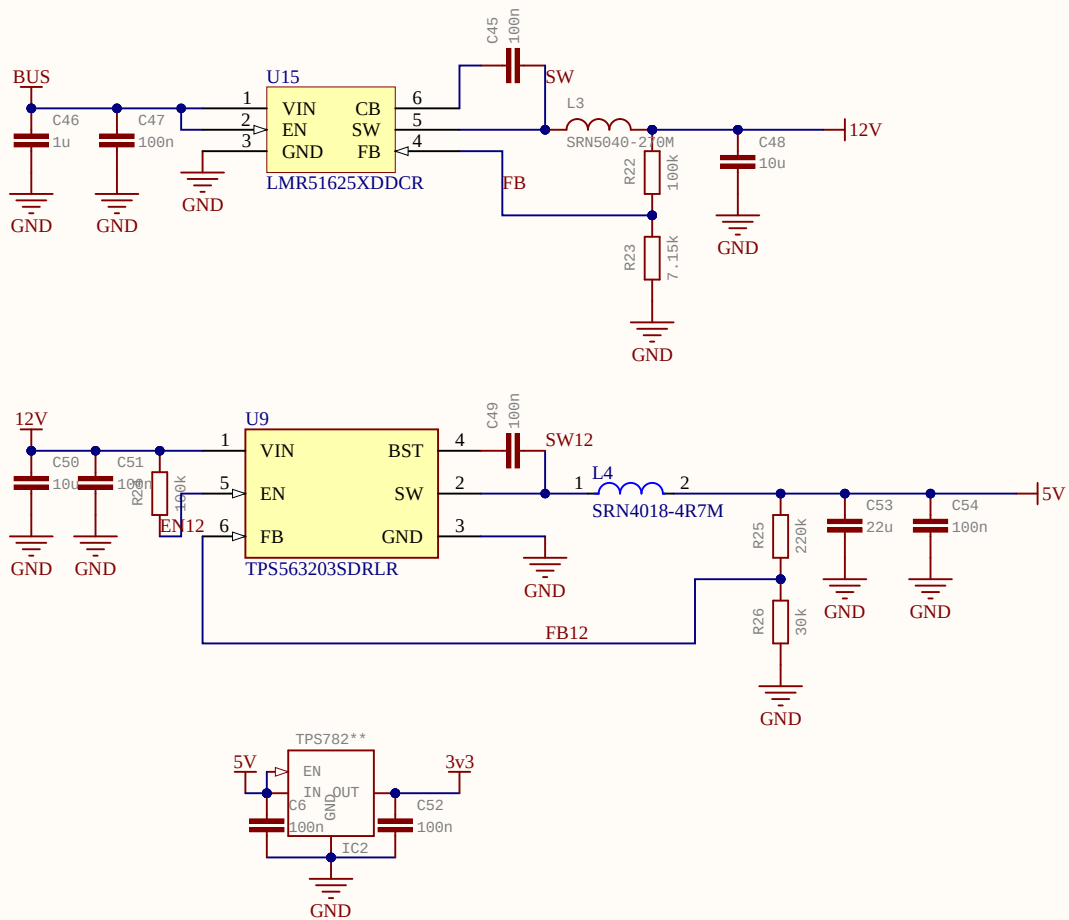

Designed by Vin Shin

My first time designing a power stage in general.

Using latest UCC27300 drivers from TI

Using goated Infineon OptiMOS 7 series FETs

Bus Voltage Converters

Designed by Vin Shin

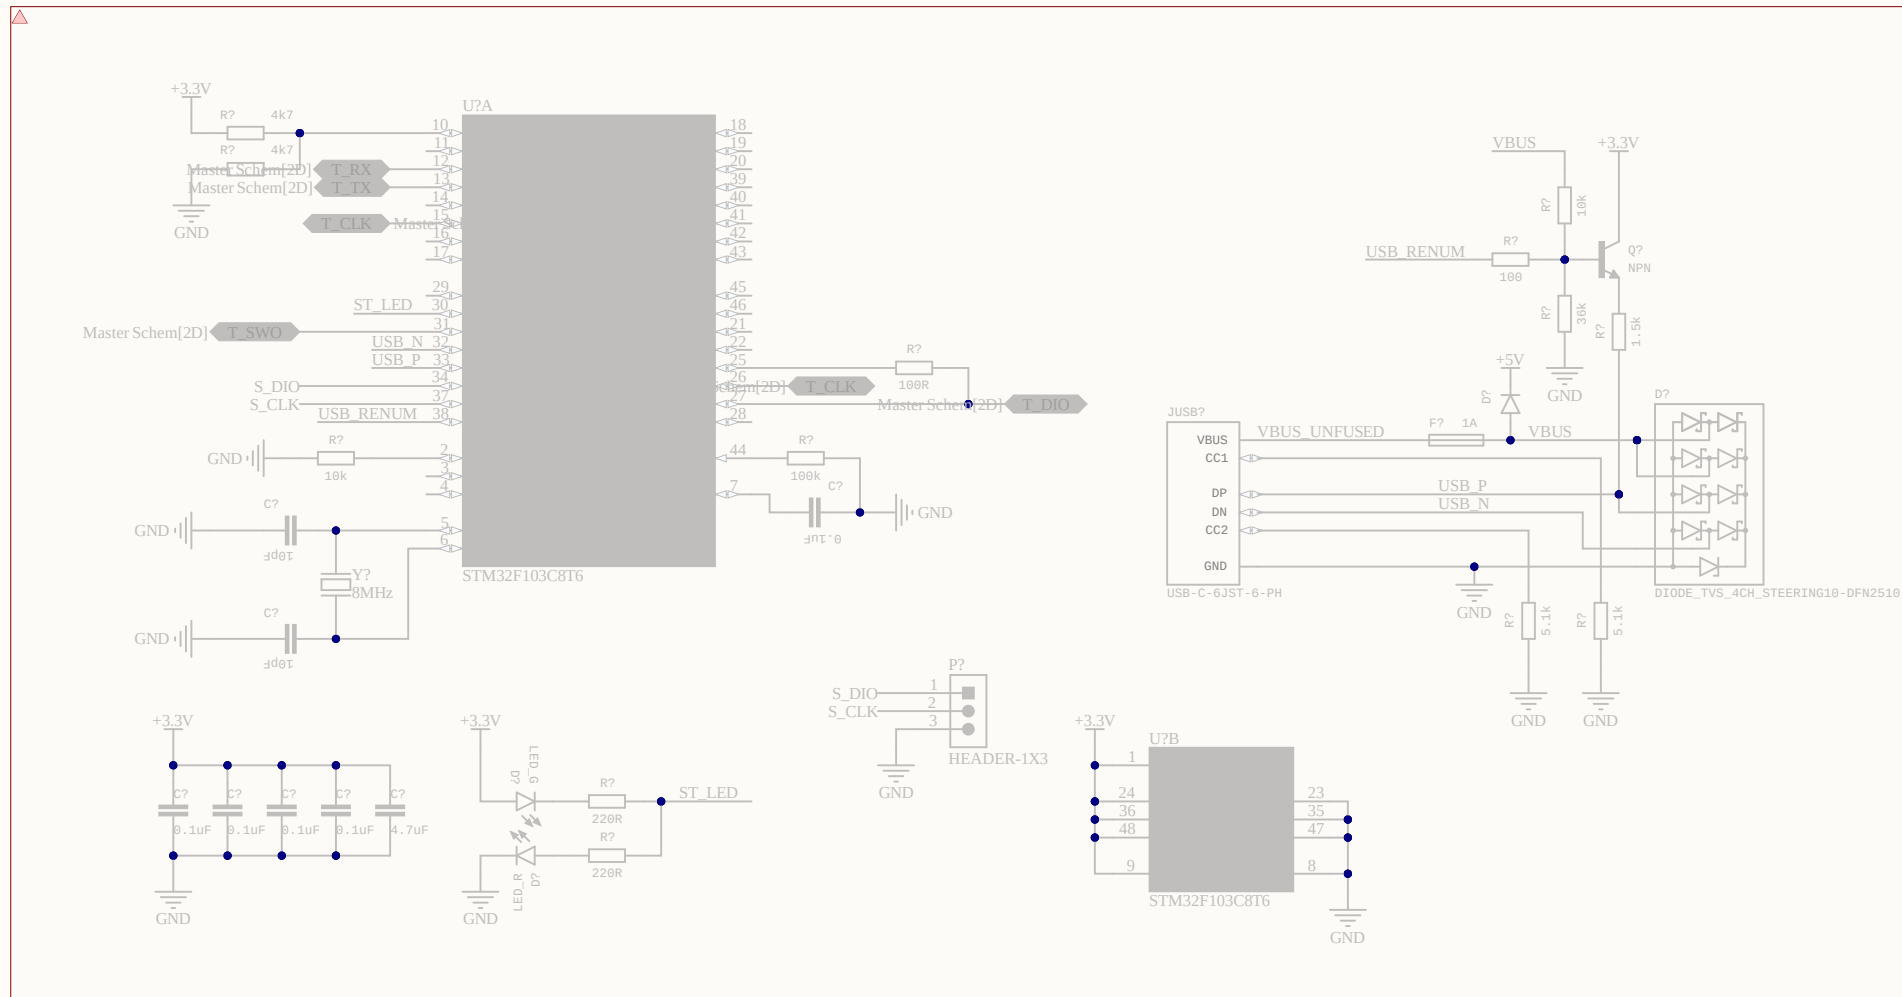

bucked!

January 2026

I am super stupid! I have no idea what I'm doing!

Picked and guessed some buck from TI and used WEBENCH

60V -> 12V -> 5V -> 3.3V Topology

STLink V2.1

Copied by Vin Shin

For easy debugging

January 2026

Only for Longfin Variant
